I use leadership, business acumen and analytics to create and execute strategy. I am a people-oriented individual who always looks for the best way to drive a product, project or a department forward. I keep teams honest on targets, talk in clear language and prioritize work that generates ROI. Recent projects saved 4,000 hours a year and added USD 2.2 million in e-commerce sales. I believe in kindness as a way of working. In my free time, I like to cook, read and program web applications and games in C#, JavaScript and Python.
